Liberal Arts & Sciences: Global Challenges

This programme  
is taught in  
**The Hague**

**Universiteit  
Leiden**

Leiden University College The Hague

Discover the world at Leiden University

## An Introduction to Liberal Arts & Sciences

A Liberal Arts & Sciences education is an approach to learning that empowers and prepares you to deal with complex, diverse and interdisciplinary topics. It helps you to develop a sense of social responsibility by exploring ideas and cultures from all over the world, from ancient times to today. Rather than focusing on a single academic field, in our Liberal Arts & Sciences programme you will gain broad knowledge from different disciplines through studying Global Challenges, and study an area of your interest in depth. At Leiden University College (LUC) you can pick your courses from a variety of disciplines across the sciences, humanities, social sciences, arts and languages, and you will develop key analytical and writing skills. Central to the programme at LUC are Global Challenges facing humanity today: Peace & Justice, Sustainability, Prosperity and Diversity. By exploring various areas of study, you can combine your talents and interests to create a programme unique to you. Depending on the direction (major) you choose, you will graduate with a Bachelor of Science or a Bachelor of Arts degree.

## Introducing LUC The Hague

Find your home away from home, studying Liberal Arts and Sciences in the international city of Peace and Justice and living together in a diverse community of students.

### International Honours College

Leiden University College (LUC) The Hague offers a three-year bachelor's degree, taught in English: an interdisciplinary Liberal Arts & Sciences programme. Each year, 200 students are admitted to this residential international honours college where LUC students live and learn on-campus in a community focused on making an impact in society. This selective programme is a great opportunity for talented, open-minded and ambitious students from all over the world. The challenging curriculum offers six majors based on Global Challenges: World Politics; International Justice; Culture, History and Society; Earth, Energy and Sustainability; Governance, Economics and Development; and Global Public Health.

### What makes LUC special?

LUC's international environment brings together students from over 50 countries. The campus is close to over 150 international organisations such as the International Criminal Court, the UN Permanent Court of Arbitration, the Organisation for the Prohibition of Chemical Weapons and many embassies, offering ample opportunity for internships and career development.

All first and second year students live on campus, combining academic and social activities. While studying at LUC, you can participate in a range of activities, clubs and traditions. LUC also provides excellent personal and academic support to help you succeed throughout your studies.

### Why The Hague?

At Leiden University in The Hague, you are at the very centre of Dutch and global politics and international law. The Hague is an internationally oriented city due to the numerous embassies, multinationals and high-level courts. It is the perfect place to study the many challenges affecting humanity, whether it involves tackling global poverty or creating safe, sustainable cities. These challenges require an interdisciplinary approach, which is exactly what Leiden University in The Hague offers by focusing on international law, peace and security, politics and public administration, urban issues and health. Also, The Hague is the fastest growing student city in the country, and you can be a part of it!

# Admissions & Application Procedure

Each year LUC selects 200 highly motivated and talented students from a pool of applicants. In order to be considered for admission all applicants need to apply in Studielink and submit the following documents in the Application Portal:

- ▶ Copy of your most recent secondary school transcript (and diploma if obtained already)
- ▶ LUC motivation form
- ▶ LUC form
- ▶ One recommendation letter
- ▶ Application fee if applicable

Complete applications are reviewed by the Admissions Committee. With a positive review, you are invited for an admission interview as a final step of the application process.

## Entry Requirements

- ▶ **Diploma requirements:** LUC The Hague accepts a Dutch VWO diploma or a secondary school diploma equivalent to it, such as the IB Diploma, the European Baccalaureate, A-levels or the German Abitur. Please check the website for a full list of equivalent diplomas and grade requirements.

- ▶ **Language requirements:** The programme is fully taught in English, and all students need to prove English language proficiency by submitting an English language test. Students with certain diplomas are exempted.
- ▶ **Mathematical requirements:** All applicants must have a general understanding of mathematics to pass the mandatory mathematics course in the first year.

## Application Deadlines

LUC has one intake each year in the fall (end of August) and two application deadlines:

- ▶ Early Bird: **1 December 2023**
- ▶ Regular: **15 March 2024**

We advise you to apply by the Early Bird deadline if you would like to receive an admissions answer before April 2024, if you need a visa, and/or if you are applying for financial aid.

 Find the precise requirements and possibilities at [universiteitleiden.nl/luc/admissions](https://universiteitleiden.nl/luc/admissions)

## Typical day of Hugo Ardura Muñoz, first-year student

08:00

I usually wake up at 8 AM. I open the curtains of my studio apartment on floor 18 which uncovers a beautiful view of The Hague, and have breakfast.

09:00

I take the elevator downstairs to floor 3 for my first class of the day: Institutions of Governance and Development. In small groups we discuss how formal and informal institutions shape exchange.

11:00

My second class is mathematical reasoning. In this course, we review basic mathematical concepts.

13:00

On the fourth floor there is a communal terrace where I meet up with friends, have lunch and enjoy the weather.

14:00

Leisure time: do some reading or go for a walk. I live close to the centre, so going to Plein or Binnenhof is within walking distance. I usually combine this with doing some basic organising of my studio: cleaning, groceries or doing laundry.

16:00

I walk to the library of Campus Wijnhaven. I always run into friends there. We catch up on our readings for the week.

19:00

I take a break from studying. The university sports centre is close, across the library, and I enjoy a yoga class there.

20:30

Floor dinner! It's great to hang out with my friends and hear about their day.

22:00

I finish up my reading for tomorrow.

00:00

I have a chat with my neighbours on my floor before heading to bed.

# Liberal Arts and Sciences: Global Challenges

## What are Global Challenges?

Global Challenges are major issues facing humanity and the planet. They cannot be solved by one nation, institution or organisation on its own. Interdisciplinary cooperation between academics, governments, organisations and individuals is required to understand these issues by combining and sharing knowledge and skills

so that they can be addressed collectively. In year one, you will follow courses dedicated to Global Challenges. These courses will help you develop interdisciplinary thinking. The plenary lectures on Global Challenges introduce you to a new topic every week and are given by specialists from different fields. The lectures are supplemented by

small-scale seminars in which you will apply the knowledge to concrete cases. Global Challenges are a central thread within our curriculum, which runs through all three years of the programme, and return in a variety of courses.

# Liberal Arts and Sciences: Academic Programme

LUC's three-year Bachelor's programme is divided into 4 blocks per year. Each block ends with a reading week (exam week) and is followed by a break.

## Your first year

In the four Global Challenge courses you explore the core themes of the programme, and this will also help you narrow down where your interests lie. You will follow a few

courses that help build a solid foundation for your studies, including writing and statistics. And you have free choice: 4 elective spaces to pick from 35 different options.

## Your Second and Third Year

From year 2 onwards, you will specialise in a major of your choice. With support from LUC academic and study advisors, you will create a tailor-made curriculum by selecting from an

array of courses that fall within your chosen major. You will supplement your major with a minor or other elective options, and with the Global Citizenship component. You can also opt for a semester abroad. Year 3 wraps up with a capstone: the equivalent of a Bachelor's thesis.

## Example programme

### Year 1

Semester 1		Semester 2	
Block 1	Block 2	Block 3	Block 4
Global Challenges: Diversity	Global Challenges: Sustainability	Global Challenges: Peace & Justice	Global Challenges: Prosperity

Capstone: Bachelor Thesis			

## Intensive and student-centred

What sets LUC apart?

- ▶ An intensive and small-scale programme with an average of 18 students per class.
- ▶ Dynamic teaching methods: presentations, discussions, group work, papers, assignments, moot courts, simulations, case studies and field work.
- ▶ Continuous assessment: you are evaluated based on several assignments, tests and presentations throughout the block, rather than a single exam taken at the end of the block. This means you get feedback on a regular basis, which boosts your learning.
- ▶ LUC's academic staff conduct research and are inspiring teachers dedicated to your learning process. In addition, they provide guidance to you in their role as academic advisers throughout all three years at LUC.

## Global Citizenship programme

You develop Global Citizenship skills when you learn to communicate across cultural and national divides and position yourself in relation to different contexts and peoples. The values of global citizenship are present throughout the entire LUC programme, and are essential to the programme as it is focused on Global Challenges. You will fulfill a global citizenship component as part of the programme. Some examples of this are:

- ▶ Community Project: Tutor pupils from our multicultural society on a local school and gain hands-on experience.
- ▶ Struggle in the City: explore the multidimensional experiences of residents in The Hague; including struggles which are often invisible.
- ▶ Sustainable Livelihoods: Participate in a field course in East Africa or Terschelling.

## Prof. Dr. Giles Scott-Smith

Dean LUC The Hague

'Why study at LUC? Perhaps because of our inter-disciplinary programme that provides you with the tools for interpreting and navigating the complex world of today. Perhaps because of our excellent academic and support staff who make the College the first-rate learning and living environment that it is. Perhaps because of our location in the international city of The Hague. But above all, because you are motivated and inspired to get the utmost out of your university experience. In that case, LUC is for you.'

## Sustainable Livelihoods

You can explore cultural diversity anywhere if you are open to it, especially with the international student body at LUC. Another way to do it is in the sustainable livelihoods field course. This course takes place either in East Africa or in Terschelling and focuses on how humans around the globe create successful livelihoods which not only bring them security and stability, but enhance their well-being, health, happiness, identity and belonging. In the field course, you leave your books behind and engage with the world around you. This gives you the opportunity to test the presumptions you hold and the theories you learned, while being immersed in a new environment. This field course is a journey of self-discovery as much as an educational programme.

## Dr. Ayo Adedokun

Assistant professor, Leiden  
Teacher of the Year award  
winner 2022

'My teaching philosophy is based on the premise that learning is more effective and productive when students are actively engaged in the process of meaning-making and knowledge construction rather than passively receiving information. So, I engage my students as co-creators of knowledge. I strongly believe that human connection is fundamental to learning. As such, I use my passion and enthusiasm for teaching to foster a positive, and caring teacher-student relationship in the classroom and to promote student engagement.'

## Majors

Each major is made up of 3 or more tracks that contain core courses and a few courses focused on qualitative or quantitative research methods. You can select one or more tracks in your chosen major to focus on an area you are most interested in. Check out our website or major flyer for more in-depth information on each track: [www.universiteitleiden.nl/luc-majors](http://www.universiteitleiden.nl/luc-majors)

### BSc Earth, Energy and Sustainability

#### Major Tracks

- ▷ Ecosystem Health
- ▷ Energy & Resource Management
- ▷ Earth Systems Science

#### Course examples

- ▷ Earth System Science
- ▷ Alternative Energy Strategies
- ▷ Marine Biology

Example Research Methodology Course: *Ecosystem Health and Biodiversity*

### BA Culture, History and Society

#### Major Tracks

- ▷ Cultural Expressions
- ▷ Historical Processes
- ▷ Social Forms

#### Course examples

- ▷ What is Culture?
- ▷ Anthropology of Difference
- ▷ History & Politics of Global Migration

Example Research Methodology Course: *Cultural and Visual Analysis*

### BA International Justice

#### Major Tracks

- ▷ International Law
- ▷ Human Rights and Society
- ▷ Statehood & Integration

#### Course examples

- ▷ Principles of Public International Law
- ▷ International & Regional Human Rights
- ▷ Comparative Legal & Economic Integration

Example Research Methodology Course: *Legal Methods Lab*

### BSc Global Public Health

#### Major Tracks

- ▷ Health Sciences
- ▷ Health and Development
- ▷ Health Data Science
- ▷ Health Policy and Politics

#### Course examples

- ▷ Health Promotion and Disease Prevention
- ▷ Ethical, Legal and Social Responsibilities of AI in Health
- ▷ Global Health Policy

Example Research Methodology Course: *Introduction to Epidemiology*

### BSc Governance, Economics and Development

#### Major Tracks

- ▷ Institutional Analysis
- ▷ Policy Science
- ▷ Philosophy, Politics & Economics
- ▷ International Development
- ▷ Comparative Politics and Political Economy
- ▷ Economics

#### Course examples

- ▷ Institutions of Governance & Development
- ▷ Political Economy
- ▷ The Dissident Mind
- ▷ Decision-making Processes

Example Research Methodology Course: *Calculus*

### BA World Politics

#### Major Tracks

- ▷ International Relations and Diplomacy
- ▷ Global and Transnational Politics
- ▷ Peace and Conflict Studies
- ▷ International History

#### Course examples

- ▷ Introduction to International Relations and Diplomacy
- ▷ Political Islam in the Middle East
- ▷ Ethics of Contemporary War

Example Research Methodology Course: *Political Research Methods*

## Next to your major

Besides your major, there are ways to add breadth and specialize in fields additional to your major. You can do this in a couple of ways:

### 1. Follow a set of pre-structured courses around a theme:

- ▷ Psychology
- ▷ Gender Studies
- ▷ Journalism
- ▷ Philosophy
- ▷ Languages: Arabic, Dutch, French, Spanish or Russian.

### 2. Minor in a major

In consultation with your study adviser, you can select a combination of courses (total of 30 EC) within one of LUC's six majors.

### 3. Minor at Leiden University or another university

You can also follow a minor at Leiden University and other institutions in the Netherlands.

## Semester abroad

LUC offers excellent students the exciting and challenging opportunity to experience living and studying in another country as an integrated part of their academic programme. The credits obtained during the study abroad semester count towards your degree. In addition to participation in the university-wide exchange programmes, LUC has its own unique exchange agreements with a selected group of universities and colleges around the world, from New Orleans to Hong Kong.

## Internships

You can do an internship for credits during your studies and benefit from the many international organisations, institutions and embassies in The Hague.

## Capstone

Crowning your LUC career is the Capstone project; a final piece of independent research in which you apply the subject knowledge, academic, analytical, and methodological skills you have acquired during your studies.

All capstone projects are carefully supervised by our research-active academic staff.

## Special programmes

At LUC, we offer two additional special programmes students can choose:

▷ **Arts:** students who who are interested in fine or performing arts, there is the option of taking courses or even a full minor at the Academy of Performing and Creative Arts. This Leiden University institute works closely with the Royal Conservatory and the Royal Academy of Creative Arts in The Hague.

▷ **Dual Law Degree:** when you complete the Major International Justice, you can combine this with the double degree programme at our Law Faculty. You will obtain a degree in Dutch law ('LLB Rechtsgeleerdheid') alongside your Liberal Arts & Sciences diploma. This double degree programme is taught in Dutch, and completing it means your Bachelor's will take four years.

## LUC Science Lab

The LUC Science Lab provides students with facilities for hands-on training and experience with fundamental scientific procedures related to the fields of sustainability and health. The laboratory supports LUC courses and also student research projects, including Capstone (bachelor thesis) research.

## Student Support

To help you handle the level of academic autonomy you have in our programme and guide you in your intellectual and personal development, LUC has a strong support network.

### Academic Support

**Academic Advisor:** When you arrive at LUC, you are assigned an Academic Advisor (a member of the academic staff) and a Mentor (a student from year 2 or 3). They help you in the transition to a demanding academic environment, guide you when you pick a major, or help you work on your study skills. There are several individual or group meetings per academic year. At the end of year 1, you will pick a major. From then onwards, you can approach academics in your major for advice on courses, tracks, external courses, capstone ideas and more.

**Study Advisor:** a Study Advisor is available to support students in selecting courses, monitoring their progress and helping them to succeed at LUC. Additionally, the Study Advisor supports students in navigating the different services and regulations which are available at Leiden University.

### Personal Support

Adjusting to university life and college culture can be quite a challenge. Besides the academic support, you also have access to an extensive support system that is unique in the Netherlands.

**Student Life Officer:** the Student Life Officer is in charge of all residential aspects of student life and oversees the Residential Assistant team.

**Residential Assistants:** there is one Residential Assistant, a senior student, on each floor. They are a first point of contact in case of emergency but are also in charge of creating a community feeling on each floor.

**Student Life Counselors:** the Student Life Counselors provide emotional and psychological support and are available throughout the week. Students may be referred to an external support service if needed.

### Maïa Bendavid Athias

#### Head Residential Assistant

‘The programme is residential the first two years, which means we live and study in one building at the campus in The Hague. The residential setting gives plenty of opportunities to learn about each other, our cultures, interests, and more. There are 400 students living here on 17 floors. Each floor has a Residential Assistant, and I am one of them! In this role, we try to foster community spirit and wellbeing. We are also the first point of contact for physical or mental health issues, for which we get a training that we will use far beyond our time at LUC. It is really gratifying to be able to help and participate in our community; whilst our studies often take a global scale, being a Residential Assistant enables me to act on a local level.’

## Living and Studying in The Hague

Find your home away from home in The Hague. Students live and study in our college building in The Hague's vibrant city centre.

The Hague is home to embassies, multinationals and international courts, as well as important government ministries, and is globally recognised as the international city of peace, justice and security. As all major institutions are within walking distance of the university, your future internship or work could literally be just around the corner.

Many professionals working in the city pop in regularly for guest lectures, making it the ideal place to benefit from hands-on insights from experts in the field.

### International student city

As an international city, The Hague offers the chance to meet people from all corners of the world. This is a great opportunity to broaden your horizons and develop networks that

will help if you later go abroad to work, study or do an internship. The Hague is also the centre of government and national politics in the Netherlands, so don't be surprised if you see the prime minister cycling or drinking a cappuccino at the next table.

### Places to be

What about your free time? The city has 35 museums and 22 theatres and concert venues. It also has hundreds of restaurants, coffee bars and cafés. You'll never be bored! There are festivals and events throughout the year and Scheveningen, or The Hague's 'back yard', is within cycling distance: 11 kilometres of beach and a lively promenade packed with great beach bars right on your doorstep.

### LUC in numbers:

- 1** university
- 2** cities (Leiden & The Hague)
- 3** year bachelor's programme
- 5** km from the college building to the beach
- 12** minutes to Leiden by train
- 18** average number of students per class
- 50** different nationalities
- 200** students admitted annually
- 600** students at LUC in total
- 1500+** LUC alumni
- 7000** Leiden University students in The Hague

## The LUC Community

The LUC community consists of a diverse team of staff members from 5 continents, and 600 students of whom 400 live in the college building. LUC students come from all over the world, over 50 different nationalities are represented. By interacting with your peers, learning continues outside the classroom while living at LUC.

## Meeting your neighbours

You will be welcomed at LUC by the Residential Assistant (RA) of your floor. You will quickly get to know your neighbours through the many floor dinners and events organised by the RA. Floor activities are a big part of the LUC community experience.

## Student Association: Fortuna

All students become a member of the student association Fortuna which is in charge of

most student activities and student-run events on campus.

Fortuna aims to represent the interests of all students enrolled at LUC by maintaining contact between members of the association and other important bodies within LUC, promoting the development and ensuring the continuity of committees set up by members of the association, representing the student body as a whole to the outside world, and organising activities to broaden the horizons of LUC students outside the curriculum.

Fortuna has several committees, each with their own contributions. Some of Fortuna's committees include:

- ▷ 22F(M) (radio)
- ▷ Act Aware
- ▷ Amnesty International Group
- ▷ Beyond Arts (Dance/Fine Arts/Music and more)

- ▷ Debating
- ▷ Diversity and Inclusion Committee
- ▷ Film Committee
- ▷ LUCV (volunteering)
- ▷ PAX (magazine)
- ▷ Sports Committee
- ▷ And more!

Members of Fortuna may enjoy events such as movie nights, (themed) parties, career-related events, Model United Nations conferences, and Dutch language courses amongst other activities. Every year, an inter-UC tournament is organised between all the university colleges of the Netherlands, during which each university college sends sports teams, dancing groups, singing groups, and artists to engage in some friendly competition.

*More detailed info about Fortuna:*  
[fortuna-luc.nl](https://fortuna-luc.nl)

# The LUC campus building

## College Building

The college building is located next to The Hague Central Station and the Royal Library. The 21-story building includes all living and learning facilities. The first 4 floors are dedicated to academic and social life including classrooms, study areas, meeting areas, a grand café, a lounge, a student-run bar and offices for staff, faculty and students.

The residential areas for students start from the fifth floor upwards. Students get a single studio apartment. Every floor houses between 17 and 26 students and one Residential Assistant (2nd or 3rd year student), and has a common room where students get together to study, eat and socialise. There are laundry and bike storage facilities on the ground floor. Having the city centre of The Hague and a park of 10 hectares called Haagse Bos as its 'backyard' makes the Anna van Buerenplein (or AvB, as our students call the building) a vibrant home for students to study and live together.

## LUC Studios

Students have a self-contained studio of approximately 27 m<sup>2</sup> with private facilities. This includes:

- ▷ Furniture
- ▷ Kitchen area
- ▷ Bathroom with a toilet, shower and washbasin with mirror
- ▷ Internet and TV connection

## The LUC building is home to many facilities

- ▷ Fully equipped science lab
- ▷ Digital lab
- ▷ Writing studio
- ▷ Student Information Desk
- ▷ The office of Fortuna, LUC's student association
- ▷ Coasters, a bar run by students
- ▷ Study Area
- ▷ Soundproof room for debating or rehearsals (music, theatre or plays)
- ▷ Audio and video equipment
- ▷ An outdoor terrace on the 4th floor

## Finances

Tuition fees are determined by your nationality. Because LUC offers a small-scale and intensive programme, tuition fees are higher than regular study programmes. The academic fees for LUC The Hague for the academic year **2024-2025** are:

- ▷ EU Tuition Fee: € 2,530 (year 1: € 1,265\*)
- ▷ Institutional Fee (applies to all): € 2,795
- ▷ Non-EU Tuition Fee: € 16,500

\* *Applicable for all first year students with EU nationality who enroll in the Dutch Higher Education System for the first time.*

The average cost per month of a studio apartment including service fees is € 620 (2023/2024 academic year, additional municipal taxes may apply). All students who are 18 years old and above are eligible for rent subsidy from the Dutch government. The rent subsidy is approximately €200 per month and can be used to cover part of the rent.

An additional annual campus fee of € 595 (2023-2024 academic year) applies for first and second year students while they live on campus. In your third year, you do not have to pay the campus fee.

## Financial support

If you are accepted into LUC The Hague, you are eligible to apply for financial support. LUC offers financial support in the form of waivers for students who demonstrate financial need. We strongly encourage you to apply by the Early Bird deadline in order to apply for financial support.

*More information about tuition fees and cost of living:*

 [universiteitleiden.nl/bachelors/tuition-fee](https://universiteitleiden.nl/bachelors/tuition-fee)

# The start of a great career

LUC has a proven track record in sending its graduates on to a wide range of top-level academic programmes and professional careers around the world.

## Further education

70% of graduates follow a master's or PhD programme in the following regions:

- ▷ 44% The Netherlands
- ▷ 25% United Kingdom
- ▷ 26% Other European Countries
- ▷ 5% Outside Europe

Top fields of study include: Business, Environmental Studies, International Relations, Law, Political Science, Public Health and Security Studies.

Some examples include:

- ▷ MPhil Social Anthropology, Cambridge University (UK)
- ▷ LLM Law of the Sea, University of Tromsø (Norway)
- ▷ MA IR & Diplomacy Studies, College d'Europe (Belgium)
- ▷ MPH Int. Health & Development, Tulane University (US)
- ▷ MSc Sustainable Resources, University College London (UK)
- ▷ MSc Human Security, Aarhus University (Denmark)

## Work/ Internships

Our alumni who are currently working can be found in:

- ▷ 40% public sector
- ▷ 40% for-profit sector (private)
- ▷ 20% non-profit sector (private)

LUC Alumni are spread out across the globe, with a majority in Europe (88%) and North America (9%).

- ▷ Intern at the World Health Organisation (Denmark)
- ▷ Internship at International Criminal Court (The Netherlands)
- ▷ Data Analyst at the Red Cross (Switzerland)
- ▷ Assistant Consultant at Oxford Policy Management (United Kingdom)
- ▷ Innovation Officer at Dutch Ministry of Foreign Affairs (United States)

## Britt van der Donk

### Graduate of the Class of 2013 (Major: World Politics)

'After LUC, I worked for one year with Oxfam Novib in The Hague before pursuing a two-year master's in International Development at SciencesPo in Paris. I currently work at the The Hague Institute for Innovation of Law (HiilL), as Programme Director. HiilL is a social enterprise that works at improving access to justice, focusing mostly on the Middle East, Africa and the Netherlands. As a director I oversee the implementation of projects across our portfolio, with projects ranging from data collection on the justice needs of people in South Sudan, to a justice innovation challenge in East Africa for small companies that might receive funding from us to scale-up. LUC taught me to think critically, how to work results-oriented with people from different backgrounds, and appreciate global and national dynamics outside of 'one' regular discipline. Being able to step outside a theoretical framework and combining all practical knowledge you have on one subject matter proved to be a crucial skill in tackling real-world problems.'

# Join our information activities

Want to find out more about LUC The Hague and what it's like to study at Leiden University? Looking for more information about the content of the programme? Keen to hear about students' experiences and ask them all about their studies? Find out which activities can help you choose the programme that suits you.

## Discover the basics of the programme

On our website you will find tips on how to make an educated decision about the right study programme for you. You will also find informational videos for all our programmes, including this one. Each video gives you more details about the content of the programme, the different courses you will study and we will inform you about your career prospects as well. Finished the video? Come and visit us on-campus during the Open Day or join our Online Open Day for international students. You will find out what students think of the programme and get to know your future student city.

## Find out more about the programme

To get an in-depth understanding of the programme, as well as experience the courses and the lectures yourself, you can take part in various activities. Become a Student for a Day or join an Experience Day on campus or online. When you are making your final decisions and have questions pending, our students are ready and available for you through the chat on our website.
